

## **IMPORTANT NOTICE – WARNING**

We have received phone calls lately about individuals going door to door pretending to be either municipal employees or from the Health Office, and demanding to analyse the water. We wish to inform the population that the municipality has not mandated anyone or any company to test the municipal water. The water is tested twice a day, 7 days a week and 52 weeks a year by the municipal employees at the water plant. The water distributed through the waterworks is of excellent quality. Furthermore, a permit is required to go door to door. If anyone knocks at your door, ask that person to show you the identification card produced by the municipality. If you do not feel comfortable letting this person in, please don't. To report any activities or persons that seem odd to you, please contact the Ontario Provincial Police.
